

The Superior Choice

Energy saving 54%

NEO introduces a new chapter in high end die casting technology.

NEO by Idra Group is the new paradigm in die-casting 'Giga' solutions (going from 340 to 6200 tons).

NEO is anticipating the future of OEM, offering the perfect solution for the production of aluminum parts for Hybrid - full electric vehicles (Structural, Battery box, Rotors) and Production of large aluminum parts made with full automated HPDC cells (Blocks, Auto gears, Multi-cavity structural).

Unparalleled Guaranteed LONG LIFE and Reliability

New Injection Series 5S[®]

5S is a revolutionary closed loop regenerative injection with aux servo pump for efficient recharge, that gives you total control of pressure and velocity.

Cell Controller Integration

Cell Controller is a brand new 4.0 architecture available in all the new machines that let you control the DCM and all the peripherals.

DCP Hydraulic System

The DCP has a new architecture, that can accomplish the same efficiency with smaller kW motors.
